

# R-PRO VIDEO WALL CONTROLLER SERIES

## About us:

**RAMP Display Solutions Private Limited** is pioneer in Video Wall Systems & technologies, we are group of highly talented professionals and we provides end to end Video Wall engineering services & solutions for NOC Rooms , Control Rooms, Situation Rooms, and Retail Environment.

Our Innovative and Domain Expert Technical support team with presence in all major cities makes us First Choice for Our Customers.

**Video Wall** Content management and source integration is key consideration for any Video Wall Solution. Being pioneer in Video Wall solution integrations; **RAMP Display Solutions** engineered an innovative design of Video Wall Controllers. Controllers are designed with principal of **“Modularity”** and **“Ease of Operations”**. These Controllers are developed based on Indian control room environment and conditions.

R-Pro Multi-Screen Controller adopts pure hardware system architecture. It processes images with the use of fast internal bus and FPGA, leading to the quick start, stable function, and real-time displaying of the image signal.

## Overview:

R-Pro controller can be used for **Multiple Splicing Modes**, with **Ethernet monitoring & control in realtime**. R-Pro controller supports **Full 60Hz Image Processing** and **Seamless Transition** between different layouts. R-Pro is very cost effective Pixel to Pixel Mapping controller to provide optimum solution to all your needs

## Features:

1. 12-Channel DVI Output
2. 8 DVI-U Inputs (DVI-U supports DVI/HDMI/VGA/CVBS)
3. Multiple Splicing Modes for 08 Inputs
4. Hardware Keys front panel for quick setup even without Software
5. Ethernet monitoring & control in real time
6. Full 60Hz Image Processing
